## Speaker Profile

**Dr. Lu, Chia-Cheng (盧家正醫師)** obtained his Doctor of Dental Surgery degree in 2003 from the National Taiwan University. After about four year of general dental practice, he pursued his further training in Implantology and Oral Rehabilitation from the College of Dentistry, New York University Continuing Dental Education Program in 2007-2008. He is a diplomate of Oral Implantology certified by Academy of Oral Implantology in Taiwan since 2011 and Asia Pacific Academy of Implant Dentistry (APAID) since 2012.

Dr. Lu extended his interest to microscopic esthetic dentistry. He is one of a few certified instructors of Leica Microscope Enhanced Dentistry since 2015. He also got a Master certification from Coachman Digital Smile Design team in 2018.

Dr. Lu is the director of Taiwan Academy of Osseointegration (TAOI). He has delivered hundreds of lectures in the field of microscopic esthetic dentistry and implantology. He is currently running a private clinic in Taipei specializing in oral rehabilitation, implantology, digital smile design and esthetic dentistry.

## Lecture Topic

### *“Anterior Implant Esthetics”*

The function and health is the foundation of dental implantology in past 50 years after the first cylinder implant was introduced. However, with the progress of technology and promote of quality of human life, we pursue not only the function but also the esthetic in implant treatment.

Therefore, we try our best to mimic the natural tooth with out implant treatment for 15 years. Because of biological and anatomical differences implant and natural teeth, the esthetic is often a huge challenge in dental implant therapy. Especially in asian bone and soft tissue quality, the graft and augmentation procedure usually make the esthetic implant treatment more complicated and risky.

The webinar will introduce and summarize several key points of implant in esthetic zone from surgical and prosthetic aspect. Hope the content will make your esthetic implant treatment better and smoother.
